

Question 10: Where are they going to have lunch on Sunday?
A. in a café B. at home C. in a pub

Identify the error. Mark the letter A, B, C, or D that needs correction.

Question 11: Many accidents is caused by careless driving.
A. driving B. many C. is D. by

Question 12: Look at the dark clouds. I'm sure it will rain soon.
A. I'm sure B. clouds C. will rain D. at

Choose the word whose stress pattern is different from the others.

Question 13: A. human B. single C. perform D. talent

Question 14: A. litter B. decide C. attract D. prepare

Choose the word in A, B, C, and D that has closest meaning to the underlined word.

Question 15: Students are reminded not to drop litter in the street.
A. money B. flowers C. rubbish D. leaves

Mark the letter A, B, C, or D to indicate the correct answer to each of the following sentences.

Question 16: More and more people ____ a green lifestyle, which is good for themselves and the environment.

A. take B. protect C. gain D. adopt

Question 17: Family ____ are important because they teach children what is right or wrong in life.

A. values B. bonds C. connections D. holidays

Question 18: Our music teacher has been invited to be a judge in many music ____ and talent shows.

A. competitions B. competing C. competitors D. competitive

Choose the word that has the underlined part pronounced differently from the others.

Question 19: A. plain B. plane C. place D. people

Question 20: A. character B. chore C. wach D. children

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks from 21 to 25.

WATER: OUR MOST PRECIOUS RESOURCE

There are (21) people around the world who do not have enough water for their daily needs. And as the world's population increases, so does the demand for water. Today, nearly 20% of the world's population live in areas (22) there isn't sufficient fresh water. Not only that, but 25% live in developing countries that suffer from frequent water (23). They lack the systems necessary to carry the water from the rivers to where it would be used.

If there is not enough clean water (24), people will drink water of poor quality. This can increase the risk of contracting diseases such as cholera and dysentery. Water is a precious resource, but in countries with anticipated above-average rainfall, like the UK or Holland, it is often taken for granted. (25), with anticipated increase in global temperatures in years to come, we should all learn to be less wasteful.

Question 21: A. another B. much C. a little D. many

Question 22: A. that B. when C. whose D. where

Question 23: A. qualities B. problems C. shortages D. threats

Question 24: A. to drink B. drinking C. drunk D. drink

Question 25: A. But B. Therefore C. However D. Besides

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions

For many years, scientists have been arguing about global warming. While they don't all agree about what this might mean for Planet Earth, many think it is going on - and that we can do something about it. We need a few more years to gather facts before anyone can say for sure. But people need to start now to do things to stop it.

There are many types of gases in our atmosphere. Some of them absorb the heat from the sun and control our climate. "Greenhouse gases" are those that hold the heat around the planet's surface. When we increase the level of these gases, we upset the balance. These extra gases trap even more heat.

Some scientists say global warming has already started to change the environment. The Earth's temperature has risen one degree Fahrenheit this century. Many scientists believe **it** could rise from two to eight degrees Fahrenheit in the next hundred years. This would be the fastest rise in 10,000 years.

Sea levels could rise. Ice sheets could melt and add to the water level. Many places near the coast would be in danger of flooding. If the climate change is too large and too fast, some plants and animals could really suffer. They could even die out. Weather could become more violent and **extreme**. In some places there would be more forest fires. But in other areas there would be more rain and snow, storms and floods.

Question 26: What is the passage mainly about?

- A. Global warming and suggested solutions.
- B. Global warming and forest fires.
- C. Global warming and its negative effects.
- D. Global warming and its advantages.

Question 27: According to the passage, gases control our climate by ____.

- A. changing the environment
- B. increasing its level
- C. upsetting the balance
- D. absorbing the heat

Question 28: The word "it" in paragraph 3 refers to ____.

- A. century
- B. environment
- C. temperature
- D. global warming

Question 29: The word "extreme" in paragraph 4 is closest in meaning to ____.

- A. severe
- B. peaceful
- C. gentle
- D. quiet

Question 30: Which of the following is **TRUE** according to the passage.

- A. Scientists have all agreed about global warming.
- B. Scientists say that global warming can never change the environment.
- C. The gases we increase trap even more heat.
- D. Climate change would cause forest fires everywhere.
