LỜI NÓI ĐẦU

Tiếng Anh 11 – Global Success – Sách học sinh được Nhà xuất bản Giáo dục Việt Nam tổ chức biên soạn theo "Chương trình giáo dục phổ thông: Chương trình môn Tiếng Anh" (từ lớp 3 đến lớp 12) ban hành theo Thông tư 32/2018/TT-BGDĐT ngày 26 tháng 12 năm 2018 của Bộ Giáo dục và Đào tạo, nối tiếp bộ sách tiếng Anh bậc tiểu học (Tiếng Anh 3, Tiếng Anh 4, Tiếng Anh 5), bộ sách tiếng Anh trung học cơ sở (Tiếng Anh 6, Tiếng Anh 7, Tiếng Anh 8, Tiếng Anh 9) và Tiếng Anh 10.

Tiếng Anh 11 – Global Success – Sách học sinh được biên soạn theo đường hướng giao tiếp, giúp học sinh phát triển năng lực giao tiếp bằng tiếng Anh dưới bốn hình thức nghe, nói, đọc, viết thông qua sử dụng ngữ liệu (ngữ âm, từ vựng, ngữ pháp). Đồng thời, sách được biên soạn theo đường hướng lấy người học làm trung tâm, theo đó mọi hoạt động dạy học được thiết kế và tổ chức đều nhằm phát huy tính tích cực, chủ động của học sinh và tạo điều kiện tối đa cho học sinh tham gia vào các hoạt động luyện tập và phát triển năng lực giao tiếp tiếng Anh.

Tiếng Anh 11 – Global Success – Sách học sinh được biên soạn theo hướng tích hợp các kĩ năng, theo đó các kĩ năng đọc, nói, nghe, viết bổ trợ cho nhau và được phát triển xoay quanh bốn chủ điểm (Theme) gần gũi với học sinh: Cuộc sống của chúng ta (Our Lives); Xã hội của chúng ta (Our Society); Môi trường của chúng ta (Our Environment) và Tương lai của chúng ta (Our Future). Bốn chủ điểm này được cụ thể hoá thành mười đơn vị bài học (Unit), mỗi đơn vị bài học tương ứng với một chủ đề (Topic). Sau mỗi chủ điểm là một bài ôn tập (Review), tập trung vào rèn luyện kiến thức ngôn ngữ và phát triển kĩ năng ngôn ngữ học sinh đã được học.

Tiếng Anh 11 – Global Success – Sách học sinh coi trọng đặc điểm tâm lí lứa tuổi của học sinh và các đặc điểm văn hoá của Việt Nam, của các nước nói tiếng Anh và của các nước trên thế giới. Ngoài ra, **Tiếng Anh 11 – Global Success – Sách học sinh** còn được biên soạn theo hướng giúp bổ sung, làm giàu thêm kiến thức nền của học sinh về một số lĩnh vực khoa học và đời sống xã hội.

Tiếng Anh 11 – Global Success – Sách học sinh được biên soạn dựa trên cơ sở lí luận hiện đại về biên soạn sách giáo khoa ngoại ngữ trên thế giới, đặc biệt là những kinh nghiệm thực tiễn của việc dạy tiếng Anh cấp trung học phổ thông ở Việt Nam, với sự hợp tác chặt chẽ về chuyên môn và kĩ thuật của Tập đoàn xuất bản Giáo dục Pearson.

Nhóm tác giả rất mong nhận được những ý kiến đóng góp của các em học sinh, các nhà giáo, các bậc phụ huynh và đông đảo bạn đọc quan tâm để sách được hoàn thiện hơn.

birthday, but he's still full of energy!

Mark: Amazing! How does he stay so active?

Grammar

Past simple vs. Present perfect

Remember!

We use the past simple to describe:

• something that started and finished in the past.

Example: You did a great job yesterday.

 something that was completed in the past (often used with a time phrase).

Example: We **lived** in Ha Noi when I was little. Now we live in Hai Phong.

We use the present perfect to describe:

 something that started in the past, and is still happening now (often used with since, for, so far).

Example: You have done a great job so far.

 something that was completed in the very recent past (often used with just or recently).

Example: We have just moved to Hai Phong.

1 Put the verbs in brackets in either the past simple or the present perfect.

1. He (see) _____ the doctor yesterday.

- 2. She (suffer) _____ from a serious headache, but after treatment, she felt better.
- Our living conditions (improve) _____ over the last few decades. Now people live much better.
- The doctor (just, examine) _____ her.
 Fortunately, the treatment is working.
- Work in pairs. Talk about what you do to keep fit and healthy. Use the past simple and the present perfect.

Example: I have exercised regularly for a year. I went swimming last weekend.

IIII READING

How to live a long and healthy life

1 Work in pairs. Look at the photos and discuss the questions.

Which photos show healthy habits? Which ones show unhealthy habits? Why?

- 2 Read the article. Solve the crossword with words and phrases from it.
 DOWN
 - (Section A, noun) the things from which something is made

ACROSS

- (First paragraph before Section A, noun phrase) the number of years that a person is likely to live
- (Section A, noun) things to keep a living thing alive and help it grow
- 4. (Section B, phrasal verb) do physical exercise

Life expectancy has generally increased over the past few decades, and some people enjoy a longer and healthier life than others. One possible explanation is that they have healthy lifestyle habits. So how can you develop these habits?

A.

Start by looking at food labels, paying attention to ingredients and nutrients, such as vitamins and minerals. Avoid having food with too much salt or sugar, such as fast food. Furthermore, add more fresh fruits and vegetables to your diet, and remember to eat a big breakfast and a small dinner.

B.___

If you have not been very active, start exercising slowly, but regularly. To begin with, choose the type of exercise that is suitable for you. Then, start slowly, for example, by doing exercise for only 5 to 10 minutes a day. When your body is ready for more exercise, you can work out longer. Finally, exercise regularly to always keep your body fit and your mind happy.

C.

A good night's sleep is very important. Before you go to bed, avoid having coffee or energy drinks. Exercise can help you have a better sleep, but avoid exercising right before bedtime. Never use your mobile phone or laptop in bed and turn off all your electronic devices at least 30 minutes before you go to bed. Their screens give off blue light that can prevent you from sleeping well. Finally, if you still can't fall asleep, do something repetitive or listen to some soft music to relax before trying to sleep again.

- 3 Read the article again. Match the sections (A-C) with the headings (1-5) below. There are TWO extra headings.
 - 1. Eat better
 - 2. Exercise regularly
 - 3. Go to bed earlier
 - 4. Develop healthy habits
 - 5. Sleep well
- 4 Read the article again. Complete the diagrams with information from the text. Use no more than TWO words for each gap.

5 Work in pairs. Discuss the following questions.

Do you find the advice in the article useful? Have you tried following any of the suggestions above?

IV SPEAKING

- 3 As you jump,
- c open your legs wider than your shoulders and move your arms out, creating a star shape while in the air.

Read the text and complete the comparison table below.

BACTERIA AND VIRUSES

Both bacteria and viruses can cause diseases, but they are different in many ways.

Bacteria are living organisms. They can live in many places, such as soil, water, and the human body. The smallest bacteria

are about 0.4 micron* in diameter. Some bacteria in our bodies are helpful, but some can cause infectious diseases such as tuberculosis** or food poisoning. Antibiotics are often used to treat infections caused by bacteria.

- *1 metre = 1 million microns
- ** a serious lung disease

Viruses are tiny germs that cause diseases in people, animals, and plants. They can cause

a range of illnesses, from the common cold or the flu to more serious diseases such as AIDS and Covid-19. As they are very small (0.02 to 0.25 micron), viruses can get into our bodies easily. They are not living things, so they need to enter our bodies to become active. Then, they start to grow and cause the infected cell to make millions of copies of the virus. Vaccines are often used to prevent the spread of diseases caused by viruses.

Living or not when entering the human body?		
2. Which is smaller?		
3. Examples of diseases they can cause		
4. How to treat/prevent diseases caused by them?		

2 Discuss in pairs. What would you say to these people?

Bacteria are so dangerous. Scientists should find a way to get rid of them all!

Unit 2

The generation gap

I GETTING STARTED

What is a generation gap?

1 (10) Listen and read.

Mark:

Ms Hoa: Good morning, class. Today, we'll talk about the generation gap. So, what is the generation gap?

Well, I think it's the difference in beliefs and

behaviours between young and older people.

Ms Hoa: You're right, Mark. So, is there a generation gap

in your family?

Mark: Not really, Ms Hoa. I live in a nuclear family with my

parents and brother. We understand each other quite well though we still argue over small things.

Ms Hoa: Right. We can't avoid daily arguments.

What about you, Mai?

Mai: Well, I live with my extended family, and I have to learn

to accept the differences between the generations.

Ms Hoa: That's a good point. Can you give us an example?

Mai: Well, my grandparents hold traditional views about

male jobs and gender roles. For example, my grandfather wants my brother to be an engineer, but my brother hopes to become a musician. And my grandmother thinks women have to do all the

housework.

Ms Hoa: How about your parents? Do they share your

grandparents' views?

Mai: No, they don't. They think that we should follow our

dreams. They give us advice, but never force us to

follow in their footsteps.

Grammar

Modal verbs: must, have to, and should

Remember!

- We use *must* and *have to* to say it is necessary to do something at present.
 - Example: Oh, it's 10 p.m. I must go home now./I have to go home now.
- We use have to to talk about the past or future.

Example: My grandmother had to do all household chores.

We will have to accept these generational differences.

When the speaker decides what is necessary, we use must. When someone else makes the
decision, we use have to.

Example: I must clean my room before my friend comes to stay with me.

I have to clean my room every day. (My mother forces me to do it.)

- We use mustn't to express something we are not allowed to do.
 - Example: You mustn't behave rudely towards other people.
- We use don't have to to say that something is not necessary.

Example: They don't have to wear uniforms at the weekend.

 We use should or shouldn't to give advice, make a recommendation, or offer an opinion about what is right or wrong.

Example: I think parents should limit their children's screen time.

1 Circle the correct answers to complete the sentences.

- 1. You must/mustn't respect older people. You can learn some valuable lessons from them.
- 2. We don't have to/have to wear uniforms on weekdays. It's the rule at our school.
- 3. You should/mustn't ask your parents for permission if you want to colour your hair.
- 4. In the past, women had to/must do all housework. It was one of their duties.

Work in pairs. Are there any rules in your family or things that you or your parents think are necessary? Share them with your partner. Use *must*, *have to*, and *should*.

Example:

- A: I have to be back home by 9 p.m.
- **B:** Really? I **don't have to**. But my parents think I **shouldn't** stay out after 10 p.m.

Generation 7

Over the past two centuries, different generations were born and given different names. Each generation comes with its characteristics, which are largely influenced by the historical, economic, and social conditions of the country they live in. However, in many countries the following three generations have common characteristics.

Generation X refers to the generation born between 1965 and 1980. When Gen Xers grew up, they experienced many social changes and developments in history. As a result, they are always ready for changes and prepared to work through changes. Gen Xers are also known as critical thinkers because they achieved higher levels of education than previous generations.

Generation Y, also known as Millennials, refers to those born between the early 1980s and late 1990s. They are curious and ready to accept changes. If there is a faster, better way of doing something, Millennials want to try it out. They also value teamwork. When working in a team, Millennials welcome different points of view and ideas from others.

Generation Z includes people born between the late 1990s and early 2010s, a time of great technological developments and changes. That is why Gen Zers are also called digital natives. They grew up online and never knew the world before digital and social media. They are very creative and able to experiment with platforms to suit their needs. Many Gen Zers are also interested in starting their own businesses and companies. They saw so many people lose their jobs, so they think it is safer to be your own boss than relying on someone else to hire you.

Soon a new generation, labelled Gen Alpha, will be on the scene. Let's wait and see if we will notice the generation gap.

Should parents strictly limit teenagers' screen time? Many teenagers nowadays spend too much time on digital devices. I firmly

- believe that parents should strictly limit their screen time for two reasons.

 First of all, teenagers who spend a lot of time on screens are less likely to finish their homework. If parents limit their screen time, teenagers will have more time not only for learning, but also for outdoor activities.

 In addition, too much screen time is bad for teenagers' health. Looking at a computer or smartphone screen for a long time can damage their evesight.
- computer or smartphone screen for a long time can damage their eyesight and cause headaches. Too much screen time may also lead to sleep and weight problems.
- 4. _____ In conclusion, I think that parents need to control the time their teenage children spend on digital devices. This will ensure that their children have time for homework and outdoor activities, and will protect children's health.
- 3 Write an opinion essay (120–150 words) stating the opposite view.

Culture

The generation gap in Asian American families

1 Read the text and complete the notes. Use no more than TWO words for each gap.

For people in most cultures, the generation gap in their family is mainly about differences in musical tastes, career choices, and lifestyles. In Asian American families, however, the process of adapting to American culture makes the generation gap wider.

Naturally, children of Asian American immigrants adapt to American culture much faster than their parents. English quickly becomes their first language. They accept American values such as individualism, freedom, honesty, and competition. They also start to follow American traditions in their daily lives.

On the other hand, many first-generation Asian American parents fail to adapt to the new culture. They continue to use their native language. They keep practising their traditional lifestyle and old culture. They often try to force their children to follow their native country's cultural values, such as the importance of family, respect for the elders and the community.

Due to their different attitudes to the new culture, Asian American children may have cultural values different from their parents' Asian cultural values. They may not do what their parents want them to do or what they are expected to do. As a result, Asian American parents may fail to have their children follow the family traditional values.

An exhibition of future cities

1 (iii) Listen and read.

Ms Smith: Good morning. Welcome to our exhibition:

Future Cities. Here you can see models of our cities of the future. Please take a look around and feel free to ask me any questions.

Nam: This model looks very interesting. Can you tell me

more about it, Ms Smith?

Ms Smith: Yes. This is a 'green city' designed to reduce its

negative impact on the environment. As you can see, more than fifty per cent of it is made up

of green greas.

Nam: I don't see any private vehicles on the roads.

Ms Smith: Most people will use public transport such as

trams and electric buses. There will be fewer

traffic jams and less pollution.

Nam: So city dwellers will stop using their cars in urban

areas.

Ms Smith: That's the idea.

Nam: I like it. It seems a good solution to many

environmental problems.

Mai: Let's look at the city over there. I can see robots

Ms Smith: It's called a 'smart city'. Al technologies, such as

cameras and smart sensors, will be installed to

help the city operate more efficiently.

Grammar

Stative verbs in the continuous form

Remember!

Stative verbs describe a state rather than an action.

They often refer to thoughts and opinions (e.g. agree, believe, remember, think, understand), feelings and emotions (e.g. hate, love, prefer), senses (e.g. appear, feel, hear, look, see, seem, smell, taste) and possession (e.g. belong, have, own).

They are not normally used in the continuous form. However, some stative verbs can be used in the continuous form to describe actions, depending on the context.

Example: My dad has a new car. He is having a good time.

1 Choose the correct forms of the verbs to complete the following sentences.

- 1. I think/am thinking that living in the city is good for young people.
- We are thinking/think of moving out of the city.
- 3. I don't see/am not seeing the building. It's too far away.

Linking verbs

A linking verb is used to link the subject with an adjective or a noun that describes or identifies the subject. Common linking verbs include be, seem, look, become, appear, sound, taste, and smell.

Example: My mum looks very tired.

We became friends.

2 Find and correct the mistakes in the following sentences.

- 1. The urban lifestyle seems more excitingly to young people.
- 2. The museum looks beauty from a distance.
- **3.** Widening the road sounds a good solve to traffic problems in the area.

Characteristics of future cities

- 1 Work in groups. Discuss the questions.
 - 1. What will future cities look like?
 - 2. Do you think they will be 'smarter' and more sustainable? Why/Why not?
- 2 Read the article. Circle the correct meanings of the highlighted words and phrases.

By 2050 the world's population is expected to reach 10 billion, and nearly 70 per cent of these people will live in cities. The cities of the future will be 'smarter' and more sustainable to cope with a growing population and improve people's lives.

A smart city is a modern urban area that uses a range of technologies to provide services, solve problems, and support people better. The new technologies can help save time by predicting changes in the traffic and warning people of possible traffic jams. They will also help cities operate more efficiently. For example, street lights can turn off when the streets are empty, and sensors can inform waste collection teams when the bins are full. These smart technologies will help save energy, reduce air pollution, and fight climate change.

Cities in the future will also be sustainable. They will include a lot of green space and become home to more plants and animals. Making room for biodiversity and nature can be done in various ways including underground and rooftop farming, green roofs, and roof gardens. As people will care more about the environment, most cities will use renewable and clean energy. Modern infrastructure will also be more eco-friendly. Computer-controlled transport systems like electric buses and trains will produce less greenhouse gas emissions. In addition, more pedestrian zones for walking and cycle paths will be made available for people in all neighbourhoods.

These features will make future cities more liveable and will provide a high quality of life to city dwellers.

- 1. operate more efficiently
 - A. to work better without wasting time, money, or energy
 - B. to control a machine without wasting resources
 - c. to cut a body open for medical reasons in a more careful way
- 2. sensors
 - A. devices that can react to light, heat, or pressure
 - B. instruments that can be played by people

 - B. areas for electric buses
 - C. areas for walking only
- 4. liveable

NEWS VORID **Economy** **Society** **Culture* LIVING IN A SMART CITY: GOOD OR BAD?

- If you live in a smart city, you will probably agree with me that life is not all good as some people may think. So what are the pros and cons of living in a smart city?
- The good thing about smart cities is that they are very modern. Smart technologies make people's lives easier by reducing household chores. Besides, the city infrastructure which includes sensors and cameras collects information about people and their activities, and uses it to provide faster, cheaper, and better services.
- On the other hand, living in a smart city has some disadvantages. Some smart technologies are difficult to use and without training, city dwellers might find them useless. With cameras everywhere in public spaces, people also have limited privacy. They are worried that their personal information might not be protected, and they might become victims of cybercrime.
- In conclusion, living in a smart city has both advantages and disadvantages. However, I think these urban areas offer great promise. The issues should be dealt with in the years ahead as the world's population keeps growing, and more people are moving to big cities.

3 Write an article (120–150 words) about other advantages and disadvantages of living in a smart city. Use the suggested ideas in 1, the sample in 2, and the outline below to help you.

Let's start with the advantages.

What about the disadvantages?

In conclusion, there are both advantages and disadvantages of living in a smart city. In my opinion,

The event will take place in the school stadium. It will start at 9 a.m. and will last for three hours. The event will be hosted by grade 11 students, who will make all the arrangements for the activities. These will include Vietnamese traditional games such as bamboo dancing, tug of war, and stilt walking.

C._

The event will help our guests learn about our culture by watching and playing Vietnamese traditional games. Taking part in fun games is also the best way to break the ice, make friends and create bonds with people.

D.

We really hope you will consider this proposal as we think that it will be beneficial to both local students and guests.

New Year Festivals in ASEAN

In ASEAN, besides welcoming the New Year on January 1, there are several cultures that celebrate New Year's Day later in the year. For example, Viet Nam, Singapore, Indonesia

and parts of Malaysia follow the lunar calendar so their New Year festivities often take place in January or February. Lunar New Year is a time for them to honour ancestors, get together with family and friends, have a big family meal, and wish one another prosperity for the year to come. The streets and houses are decorated, and fireworks are lit to scare away bad luck. There are also parades, street parties, and art performances in the new year celebrations.

People in Laos, Cambodia, Thailand, and Myanmar celebrate the arrival of the New Year according to the Buddhist calendar. Their New Year's celebrations are in April. People in these countries follow traditions such as offering rice to Buddhist monks to show their respect and receiving wishes for good luck and health from them. They decorate their homes, cook traditional dishes, and splash each other with water. There are also art performances, folk games, and dancing.

In these cultures, it is believed that water will wash away bad luck and ill health from the old year and allow people to start the new year fresh.

I GETTING STARTED

A presentation about global warming

1 (34) Listen and read.

Mr Quang: Good morning, class. Today's lesson will start with

Mai and Nam's talk about some of the causes and consequences of global warming. Would you like

to go first, Mai?

Mai: Yes, thank you. First, let me remind you what

global warming refers to - it's the increase in the earth's temperature because of certain gases in

the atmosphere.

Nam: Exactly. These gases are mainly produced

through human activities. For example, burnt for energy, fossil fuels release large amounts of

carbon dioxide into the atmosphere.

Mr Quang: But how do these gases make the earth warmer?

Mai: Well, they act like the glass in a greenhouse.

Trapping too much of the sun's heat, they stop it from escaping back into space. This makes the

planet hotter and hotter.

Nam: That's right. That's why these heat-trapping

pollutants are known as greenhouse gases, and their impact is called the greenhouse effect.

Mai: Global warming is also linked to rising sea levels.

As temperatures rise, polar ice caps melt faster, adding more water to oceans. Higher sea levels

can also lead to floods.

Nam: Each year, the consequences of global warming

become more serious, and its negative impact on the environment and people gets stronger.

Mr Quang: Good job! Thank you for sharing the information.

- 2 Read the conversation again and complete the diagram, using the following phrases.
 - Trapping the sun's heat
 - b. Making the planet warmer
 - c. Producing certain gases (e.g. CO₂)
 - d. Stopping the heat from escaping

1. ____ 3. ___ 4. __

3 Match the words to make phrases used in 1.

 - ______ too much of the sun's heat, greenhouse gases stop it from escaping back into space.
 - **3.** As temperatures rise, polar ice caps melt faster, more water to oceans.

Pronunciation

Sentence stress and rhythm

Remember!

- Content words (e.g. main verbs, nouns, adjectives, and adverbs) are often stressed, while grammatical words (e.g. conjunctions, pronouns, prepositions, auxiliaries, articles) are not.
- This combination of stressed and unstressed syllables produces the rhythm of spoken English.
- To sound natural and fluent, you should try to stress the correct words in your spoken sentences.
- 1 (35) Listen and repeat. Pay attention to the sentence stress and rhythm.
 - 1. The planet is getting hotter and hotter.
 - We talked about the causes of floods.
 - Burning coal is bad for our health.
 - **4.** Why is **farming** a **big source** of **greenhouse gases**?
- 2 (36) Underline the stressed words in the sentences. Listen and check. Then practise saying the sentences with a natural rhythm.
 - The village was completely destroyed by floods.
 - Some gases are released into the air through human activities.
 - 3. Has the earth's temperature increased in the past few years?
 - Some environmental disasters will become more frequent.

Vocabulary

1 Match the words with their meanings.

- that can be replaced naturally without being used up
- 2 fossil fuel (n)

- Her grandpa is now suffering from ill health after many years of working in the industry.
- 5. The burning of ______ like coal and gas has led to an increase in the amount of CO₂ in the atmosphere.

Grammar

Present participle clauses

Remember!

The present participle is used to form a participle clause when the participle and the verb in the main clause have the same subject and the action is done by the same person or thing.

The present participle is a verb form ending in *-ing* and it has an active meaning. Present participle clauses are used to:

- explain the reason for an action.
 - Example: Trapping too much of the sun's heat, greenhouse gases stop it from escaping back into space.
- talk about two actions happening at the same time.

Example: Walking on the beach, they picked up litter.

1 Find and correct the mistakes in the following sentences.

- 1. Was waiting for the train, I read some articles about global warming.
- 2. Saw the forest fire, the children immediately called the police.
- The students took part in green activities, were planting more than 100 trees.

Past participle clauses

Remember!

The past participle is a verb form usually ending in -ed, which normally has a passive meaning. Similar to present participles, past participles can form past participle clauses, but with a passive meaning. They are used to:

- give the reason for an action.
 - Example: Worried about climate change, many young people joined the environmental protests. (Many young people are worried about climate change, so they joined the environmental protests.)
- · express a condition.

Example: Burnt for energy, fossil fuels release carbon dioxide into the atmosphere. (If fossil fuels are burnt for energy, they release carbon dioxide into the atmosphere.)

2 Rewrite these sentences using past participle clauses.

Example: We were given enough information about the causes of global warming, so we started our report.

- → Given enough information about the causes of global warming, we started our report.
- 1. If farm animals are not kept cool in hot weather, they can suffer from heat stress.
 - → _____, farm animals can suffer from heat stress.
- 2. Some farmers were worried about the consequences of deforestation, so they stopped burning trees to create farmland.
 - → _____, some farmers stopped burning trees to create farmland.
- 3. If carbon dioxide is produced in huge amounts, it causes air pollution and climate change.
 - → _____, carbon dioxide causes air pollution and climate change.
- 3 Work in pairs. Make sentences, using present participle and past participle clauses.

Example: Learning about the impact of global warming, we decided to save more energy.

Encouraged by our teacher, we started some environment projects.

III READING

The UN Climate Change Conference

1 Work in pairs. Look at the pictures and discuss the environmental problems you see.

2 Read the article and choose the best title for it.

In 1994, the UN decided to bring together world leaders for an annual event, known as COP or 'Conference of Parties', to discuss climate change. This year's conference will review what has been achieved and discuss the key goals.

- A. History of COPs
- B. Main causes of global warming
- C. Main goals of this year's COP

The first goal is to limit the global temperature rise to 1.5° C.

This will require reducing global CO₂ emissions by 50 per cent by 2030, and by 2050 achieving a balance between the greenhouse gases released into the atmosphere and those removed from it.

The second goal is to reduce the use of coal, which is the dirtiest fuel and biggest source of planet-warming CO₂ emissions. Countries will have to stop building new coal plants and switch to clean sources of energy.

The third goal is to end deforestation. Forests remove CO_2 from the atmosphere and slow global warming. But when they are cut down or burnt, they release the <u>carbon</u> stored in the trees into the atmosphere as CO_2 . Stopping deforestation is , therefore, an effective solution to climate change.

The last key goal is to reduce methane emissions. Methane is a greenhouse gas that is more powerful than CO_2 at warming the earth. It is responsible for nearly one-third of current warming from human activities. Methane comes from farming activities and landfill waste. The production and use of coal, oil, and natural gas also release methane.

This conference is very important because this is the best last chance we have to slow global warming. World leaders, climate experts, organisations, and national representatives will carefully discuss these goals and agree on how to make global progress on climate change.

3 Read the article again. Match the highlighted words with their meanings.

- emissions
- a gas without smell or colour, often used as a fuel
- Ø balance
- b a chemical substance found in all living things
- 3 carbon
- a situation in which different things are equal
- 4 methane
- d gases or other substances that are sent into the atmosphere

4 Read the article again and choose the correct answers A, B, or C.

- Which of the following is not a COP's key goal?
 - A. Stop cutting down forests.
 - B. Replace coal with cleaner sources of energy.
 - C. End methane emissions.
- 2. What will happen if there is a balance between the greenhouse gases released and those removed from the atmosphere?
 - A. Global warming will be limited to 1.5°C.
 - B. Global CO₂ emissions will increase.
 - C. Countries will switch to clean energy.
- 3. Why is it important to reduce the use of coal?
- A. Because it is easy to build coal plants.
- B. Because coal is not as clean as gas.
- C. Because it is responsible for a large part of the CO₂ emissions.
- 4. How does deforestation contribute to global warming?
 - A. Trees remove carbon dioxide from the atmosphere.
 - **B.** Trees release carbon into the atmosphere when they are cut down or burnt.
 - C. Forests trap heat and increase temperatures.
- 5. Why is reducing methane emissions a key goal?
 - A. Because its emissions result from farming activities and landfill waste.
 - B. Because methane's warming power is stronger than that of CO₂.
 - C. Because it is produced through human activities.

5 Work in groups. Discuss the following question.

What should we do to reduce global warming?

IV SPEAKING

Human activities and global warming

- 1 Match the activities (1–3) with their possible effects on the environment (a–f).
- Cutting down or burning forests
- Burning coal, oil, and gas
- 3 Raising farm animals like goats, sheep, and cows
- When burnt, fossil fuels release greenhouse gases, trapping heat in the atmosphere.
- b When eating, these animals produce a lot of methane. This gas is responsible for nearly one-third of current global warming.
- c Trees use CO₂ to grow, so when they are cut down or burnt, the CO₂ in the air increases.
- d Carbon from fossil fuels combines with oxygen in the air to form large amounts of CO₂.
- Forests store carbon in the trees and soil, and help reduce the global temperature.
- forests are cut down to make space for farm animals.

2 Use the sentences in the box to complete the conversation. Then practise it in pairs.

- A.First, deforestation leads to more CO₂ in the gir
- B. I think it's cutting down or burning forests
- C. This also makes the earth even warmer
- D. Well, there are two main reasons

Mark: Mai, which human activity is the main cause of global warming?

Mai: (1) _____.

Mark: Why do you think so?

Mai: (2) _____. (3) ____. Trees use CO₂ to grow, so when they are cut down or burnt, CO₂ in the air increases.

Mark: I see.

Mai: (4) ______. Forests store carbon in the trees and soil, and help reduce the global temperature. That's why I think cutting down or burning forests is the most serious problem.

Tips

To present your ideas clearly in a discussion, you should:

- state your opinion directly, e.g. I think/ believe the most serious problem is burning coal, oil, and gas.
- introduce your arguments, e.g. *There* are two main reasons.
- use linking words to order your arguments,
 e.g. First,/Second, ...

Besides,/Moreover,/In addition, ...

Last,/Finally, ...

- Work in pairs. Talk about the other human activities that contribute to global warming. Use the ideas in 1, the model and the tips in 2 to help you.
- 4 Work in groups. Decide which human activity contributes to global warming the most. Report to the whole class.

 - B. heat-trapping gases
 - C. other heat-trapping pollutants
- 4 Work in groups and answer the questions.

Is black carbon found in your city or neighbourhood? If so, where does it come from?

VI WRITING

A leaflet about ways to reduce black carbon emissions

1 Work in pairs. Match the ways to reduce black carbon emissions (1–3) with the reasons (a–i) for doing so.

Stop burning waste

- Soot from open waste burning has a strong warming effect on the earth.
- Renewable energy is clean, so it doesn't pollute the environment.The burning of waste in open fires is bad for the environment.
- (d) The burning of organic waste produces nearly one-third of global black carbon emissions.
- 2 Stop using solid fuels at home
- Fossil fuels will be used up in this century while renewable energy will never run out because it comes from natural sources.
- 1 Household air pollution kills millions of people yearly.
- 3 Switch to renewable energy
- Used for cooking or heating, solid fuels like coal and wood release black carbon and other pollutants.
- (h) Renewable energy can replace fossil fuels because it is convenient and reliable.
- i) The tiny pieces of black carbon released from indoor stoves can enter the human body and cause serious health problems.
- Work in pairs. Label the parts of the leaflet with the words in the box. Use the tips on page 59 to help you.

One of the purposes of writing a leaflet is to persuade the readers to agree with you. You should:

- use a heading to grab readers' attention.
- begin each paragraph with a catchy subheading.
- · develop each idea in a separate paragraph.
- · keep the language of the leaflet simple, brief, and clear.
- use easy-to-remember slogans to express your ideas quickly and attract the readers' attention.
- · end your leaflet with a good call for action.
- · include images and different colours to make your leaflet look attractive and interesting.
- 3 You are organising your school's Green Fair. Write about 120–150 words to complete the leaflet in 2. Use the suggested ideas in 1, and the tips above to help you.

CLIL

1 Read the text and tick (\checkmark) the pictures that show ways to reduce global warming.

REDUCING THE ENVIRONMENTAL IMPACT OF FARMING

Farming provides us with the food that we eat every day. But farming activities also have a strong warming impact on the global temperature. The good news is that experts have already started thinking about how to reduce it.

Raising farm animals like cows, goats, and sheep makes the planet hotter. There are billions of them and they release methane, a greenhouse gas that is much more dangerous than carbon dioxide. That is why scientists are developing methane-catching face masks for cows. They are intended to reduce methane emissions by up to 50 per cent per cow.

Another farming activity that heats the atmosphere is growing rice. According to research, emissions from rice farms have the same warming effect as about 600 coal plants. Flooded rice fields also make it easier for soil bacteria to produce greenhouse gases. New farming methods have allowed rice to grow well in drier fields, limit the amount of greenhouse gases, use less water, and produce better crops.

In addition, land-use increases the global temperature. Plants and trees use CO₂ to grow and store large amounts of carbon underground. Cutting down or burning forests to create farm fields and land for feeding animals releases tonnes of carbon dioxide and other greenhouse gases into the atmosphere every year. Luckily, many countries and world leaders have agreed to protect the forests and end deforestation.

In short, there are some positive signs that farmers can meet the environmental challenges. However, although the impact of farming on the global temperature has been reduced, there is still much to do.

2 Work in groups. Discuss the following questions.

What farming activities in Viet Nam do you think have negative impact on the global temperature? What do you think are the alternatives to those activities?

Heritage sites in Viet Nam

1 (45) Listen and read.

Ms Hoa: Good morning, everyone. As part of our school cultural

programme, we need to plan a field trip to a heritage site in Viet Nam. So, where would you like to go?

Peter: Do you have any suggestions for us, Ms Hoa?

Ms Hoa: I'd recommend Trang An Scenic Landscape Complex.

It's the only place in Southeast Asia to be recognised

as a mixed heritage site by UNESCO.

Peter: What's a mixed heritage site?

Ms Hoa: It's a site that has both natural and cultural importance.

For example, you can go on a boat trip there to enjoy the beautiful landscape. Or you can visit the old temples and monuments to learn about Vietnamese history.

Anna: That sounds interesting, but if we want to learn about

cultural values of the past, where should we go?

Ms Hoa: You can go to Hoi An Ancient Town in central

Viet Nam. You'll learn about urban lifestyles and traditions from the 15th to the 19th century and will see examples of ancient architecture. All buildings are kept in their original state. It's a great place to explore.

Anna: Wow! That's exciting. What about southern Viet Nam?

Ms Hoa: You can go to the Mekong River

Delta to enjoy don ca tai tu – a form of traditional folk singing. Local artists perform don ca tai tu everywhere – at parties, in fruit gardens, even on the floating

market boats.

Peter: It's a great way to promote this

kind of cultural heritage of southern

Viet Nam.

Ms Hoa: Indeed. Now, please discuss in your group and let me know your field

trip ideas.

To encourage young people to learn about and appreciate our cultural heritage, we organised an ideas competition. We invited students from across the country to send us their ideas for protecting and promoting our heritage. We have received many interesting entries. Below are the winners.

A.

The idea of promoting heritage sites through social media came from a group of 11th grade students. They suggested using social media activities, such as photo competitions, to encourage young people to learn about our heritage sites and local traditions on important festivals. They also suggested creating trending topics or challenges on social media. For example, a postcard challenge will invite people to create and share unusual and exciting postcards about the heritage sites that they have visited.

 - B. to listen to someone's advice
 - C. to express opinions about something

Two 10th grade students suggested forming historical societies or local groups who have a keen interest in their history and heritage. These groups will provide information about local heritage sites, organise special events to celebrate local festivals, and invite young people to discuss issues related to preserving the heritage. This way, they will be able to give voice to suggestions and solutions to problems they care about. They will feel that their voices are heard, and they can contribute to society.

C

To preserve heritage, such as traditional music and stories, a group of secondary school students proposed setting up folk clubs. The clubs will hold events for young people to experience and learn about traditional performing arts. The artists will not only perform, but also introduce their arts and talk about how students can help promote folk culture. The clubs will organise training for students who want to learn folk songs, a traditional musical instrument, or folk dancing.

PRESERVING HERITAGE AROUND THE WORLD

Crowdfunding for heritage!

Preserving their heritage can present a challenge to many nations, especially if they have a large number of heritage sites, like Italy does. However, the country has found a new method of raising money for heritage projects from a large number of individuals and businesses - crowdfunding. For example, **loveitaly**, a non-profit organisation, uses its website to reach all the people around the world who love Italy, and collects donations from everyone who wants to help. One of their first success stories was raising enough money to restore an ancient site in Pompeii.

Strict heritage laws

In Australia, individuals and companies have to pay a fine of AU\$1,000 to AU\$5,000 for any damage to heritage sites or objects, regardless of whether they can be repaired. In some cases, the fines are heavier, and people could even face time in prison. The authorities hope the harsher punishments can stop people from destroying or damaging

cultural sites and items, and prevent heritage crime.

Tourism works!

Spain is one of the countries that has successfully promoted its cultural heritage through tourism.

For many years, festivals such as La Tomatina (in which people throw tomatoes at each other) or Las Fallas (a five-day festival of fireworks and light shows) in Valencia have attracted millions of local and foreign tourists. The unique architecture in Barcelona, home to nine UNESCO World Heritage Sites, and Santiago de Compostela's Old Town, which is also on the world heritage list, are famous all over the world.

Which country ...

- 2. organises successful festivals that attract visitors from around the world?

Options for school-leavers

- 2 Read the article. Match the highlighted words with their meanings.

THE EDUCATIONAL JOURNEY FOR SCHOOL-LEAVERS

This month, Teen Talk magazine has received many letters from secondary school students asking about the different options for school-leavers. We've talked to educational experts, and they think that young people should either continue their studies at a college or university or go to a vocational school.

Λ

Higher education is really for people who want formal learning in order to get an academic degree. If you are good at certain subjects and need a degree related to those subjects, then university is the right choice for you. Besides studying, university students also have the opportunity to live independently, make new friends, and join different clubs. Many students still manage to work part-time during their university years. In addition, college or university students usually have an advantage over students from vocational schools when it comes to further studies after a degree. They will also have broader career options and an advantage in the job market.

B.

If you are not interested in traditional academic subjects and want to work in a specific trade, then vocational education is the right choice for you. You will gain the practical skills and knowledge necessary for a specific job. In addition, a vocational school may also offer you an apprenticeship. This type of training not only provides students with hands-on experience, but also gives them wages to cover their living costs. Most importantly, vocational training is usually much shorter than a college or university course. After getting their vocational qualifications, graduates can immediately start work and earn a salary.

There are a lot of educational opportunities for school-leavers today. You can choose from hundreds of vocational schools or higher education institutions to continue your educational journey.

- 1 formal
- a job that requires special training and skills
- 2 manage
- b a period of time working for and learning from a skilled person
- trade
- to succeed in doing something difficult
- apprenticeship
- important organisations that have a particular purpose
- institutions
- received in a school, college, or university, with lessons, exams, etc.
- 3 Read the article again. Match the headings (1-3) with the paragraphs (A-B). There is ONE extra heading.
 - 1. Getting vocational training
 - 2. Earning a salary while studying
 - 3. Going to college or university
- 4 Read the article again and complete each gap with ONE word.

UK EDUCATION AFTER SECONDARY SCHOOL

In the UK, students can choose to end their formal education at 16, but in England they must stay in full-time education or do a training course until the age of 18.

Many 16-year-old students go on to study at different vocational colleges. Vocational education usually lasts up to three years. During this time, students learn job-specific skills. That is why vocational education is often referred to as career education or technical education. Many students still go on to higher education after receiving their vocational qualifications.

Alternatively, students can go to a sixth-form college or stay at their secondary school if it offers a sixth form for two more years. Students usually focus on three or four subjects that they are interested in or related to the degree they want to study at university. Exams are taken at the end of the two-year course, and the grades are used to apply for university courses. Not all students leaving sixth form go to university. Some prefer to get into a vocational course or find a job.

At university, students study for at least three years in order to get a bachelor's degree. After the first degree, they can study for one to two years to get a master's degree, and three to five years to get a doctorate.

Creating a detailed plan to develop a life skill

1 (59) Listen and read.

Nam: Mai, why don't you answer your phone? It keeps ringing.

Mai: It's my mum who's calling me again. She wants me to contact her from time to time while I'm out.

Nam: My parents used to be like that. They thought I didn't have the confidence to deal with difficult situations.

Mark: I had the same experience. It was earning my parents' trust that took a long time. But I managed to convince them that I'm responsible when I'm out and about.

Mai: It's my parents who still think I don't have the skills to be independent. I'm not good at managing my time or money, but I'm independent at home – I can cook, clean the house, and do my laundry!

Nam: That's a good start! I use a time-management app to plan my weekly schedule including all my activities and responsibilities. Would you like me to help you install it?

Mai: That'd be great. Thanks, Nam.

Mark: I use a money-management app. It's the app that taught me how to be responsible with money.

Mai: Mark, can you show it to me?

Mark: No problem. My parents also encourage me to take part-time jobs and pay me for doing certain chores around the house.

Mai: Lucky you!

How to become independent

1 Tick (\$\sqrt{}\sqrt{}\) the appropriate box to see how independent you are. Add up your points. If your total score is nine or above, you are independent. Compare with a partner.

How often do you?	Always (3 points)	Sometimes (2 points)	Never (1 point)
1. go to school by yourself			
2. cook meals for your family			
3. communicate well with people			······································
4. think carefully before making decisions			
5. plan how to save and spend your pocket money			

- 2 Read the text. Match the paragraphs (A-C) with the headings (1-5). There are TWO extra headings.
 - 1. Manage your money
 - 3. Develop time-management skills
 - 5. Learn basic, but important life skills
- Relax and sleep well
- 4. Improve your decision-making skill

Becoming independent is important for teenagers. Below are the necessary skills you should learn to achieve independence for the future.

A. _____

First, make sure you can safely get around by yourself using public transport, walking, or cycling. Second, learn to communicate well and develop good relationships with people. Do some part-time jobs and get to know how to manage your money. You should also learn to cook healthy meals for your family. Finally, help your parents with household chores like cleaning and doing laundry.

R

To begin with, identify the problem and come up with as many solutions as possible. Write down the options, so you can review the advantages and disadvantages of each one. This will help you see which option could be the best for you. Don't base your decision on emotion only. Once you have made your choice, create a plan of specific steps to move forward. Then carry out your plan, and think about whether you have achieved the result you wanted.

C.

First of all, get into the habit of making a to-do-list every day or week. Make use of time-management tools, such as apps or diaries, to know what you need to do next. In addition, decide how much time you need for each task and always do one thing at a time to make sure you complete it. Schedule time to relax as well, and make sure you sleep at least nine hours each night. A good night's sleep is necessary for teenage brain development and good health.

Becoming independent is not easy, but it is not as challenging as you may think. It's about learning useful skills, making decisions by yourself, and knowing how to spend your time.

3 Read the text again and match the highlighted phrases in the text with their meanings.

- get around

Teen independence in the US

1 Read the text below and complete the diagram.
Use no more than THREE words for each gap.

American parents usually encourage independence in their teenage children, and it is normal for teens to want more responsibility and freedom for their choices.

American teenagers often start high school with a basic plan of classes they need to take to get a high school diploma. Some subjects like English, maths, science, or social studies are required, others can be selected. Schools also provide extracurricular activities, such as sports, clubs, and bands. American teenagers who plan to go to college study hard to get good grades. They are highly motivated and very confident, and take responsibility for their learning.

Many American teenagers have part-time jobs as they want to gain work experience and learn how to manage their money. Many teens work at fast-food restaurants and stores, or do babysitting, and dog walking for neighbours. They also volunteer at local hospitals, food banks, and old people's homes, or take part in clean-up activities to improve their neighbourhood. This community service counts towards the volunteer hours that some schools require for university admission.

The teenage years form an important period of their development that influences adult life. The main goal of this period for most American teenagers is becoming independent, and they work hard both at school and outside school to achieve this goal.

2 Work in groups. Discuss the following questions.

Do American teenagers learn to become independent in the same way as Vietnamese teenagers? What are the similarities and differences?

Example: I think I'll become more independent by learning to cook for myself. It's very expensive and unhealthy to eat out frequently. Besides, the food in the country where I'll be studying may not suit me, so it'd be nice if I could prepare dishes from my own country.

DON CA TAI TU: THE VOICE OF THE SOUTHERN PEOPLE

Recognised as UNESCO's world cultural heritage in 2013, don ca tai tu has been an important part of people's life and work in the Mekong River Delta region.

Having appeared in the late 19th century, don ca tai tu became a popular art form in southern Viet Nam. It started as daily entertainment for the village farmers, who were good neighbours and close friends. After working hard in the fields, the neighbours usually gathered together to sing and relax. This was the time when people started performing this kind of music.

D		

Typically, the men in the group play the instruments while the women sing. Most of the musicians and singers are not professionally trained; they are just music lovers performing with all their heart. They usually perform at events such as weddings and traditional festivals, and the melodies express different moods and feelings.

C.

Today, tourists can enjoy don ca tai tu performances in southern Viet Nam, where local artists perform at floating markets or in fruit gardens.

Such performances help preserve the art form and allow artists to reach a wider audience, including people from around the world.

2 Read the text again and decide whether the statements are true (T) or false (F).

Planning an awareness campaign about a social issue

I GETTING STARTED

A social awareness club meeting

1 (69) Listen and read.

Mark: Hi, everyone. Last time our club met, we decided to start an awareness campaign to draw attention to a pressing social issue. So have you thought about any issues that we could focus on?

Mai: Yes, I think we should promote issues that affect a lot of people in our city, such as crime and overpopulation.

Nam: I like your ideas, Mai, but I think we should plan our campaign around social issues that directly affect teenagers like us.

Mark: Can you give us some examples?

Nam: Well, bullying, peer pressure, and body shaming, for instance, are major problems among teenagers today although many people don't feel comfortable talking about them.

Mai: I agree with you, Hmm... so Mark, what do you think? Should we focus our campaign on a general social issue or one affecting mainly teens?

Mark: Hmm. I think this time we should focus on a problem teens struggle with every day because this won't be a big campaign. However, we'll try to use your ideas for another project, Mai.

Mai: Sounds good! Now let's decide on a social issue. Is the top problem facing teens today peer pressure, body shaming, or bullying?

Nam: I think it's bullying because it's very common today, and ...

2 Read the article. Match the highlighted words and phrase with their meanings.

Teen's life

I DON'T WANT TO BE THE ODD ONE OUT

'My parents don't want me to hang out with my friends from school. They think those friends have a bad influence on me. They aren't happy that instead of going home after school, we go to games centres to play video games. But I think it's fun, and I don't want to lose my friends,' Thanh, 17.

'One day I coloured my hair and painted my finger nails. My parents got so angry with me. I know that this is not allowed at school, but all the girls in my group of friends did the same. I don't want to be the odd one out!,' Van, 16.

- [A] The emails we have received from teenagers this week point to the effects of peer pressure, which is when you do things because you want to be accepted or valued by your friends. If teens fail to do what their group of friends want them to do, they may not be accepted or may even be bullied.
- [B] In many cases, peer pressure can lead to depression, low self-confidence, distance

from family and poor school performance. It can also lead to bigger social issues. It was reported that 70% of teenage smokers surveyed in the US said that they started smoking because they had friends who were smoking.

[C] It is not always easy to stand up to peer pressure, but sooner or later you need to decide what is best for you. Choose the right friends, learn to say no when you don't feel comfortable and don't hesitate to talk to an adult when the situation looks dangerous. And remember it's sometimes OK to be 'the odd one out'.

SOCIAL PROBLEMS FACING TEENS IN THE US TODAY

In many countries around the world, it is not easy growing up because teens are dealing with many social issues. A study carried out by a famous research centre in the US found out that the following were among the most serious ones.

Anxiety and depression: Seven in ten teenagers considered them a serious problem among their peers. The main source of teenagers' anxiety and depression was social pressure, such as the pressure to look good, to fit in social groups, and to be good at sport.

Bullying: 55% said that bullying was a major problem for teenagers, and around 15% admitted that they had experienced some form of cyberbullying. Girls or younger students were more likely to be victims of bullying.

Poverty: Four out of 10 teens said that poverty was also a major problem for them. In fact, about 20% of the teens in the survey struggled to live below the poverty line every day.

The survey results suggest that more support should be provided to help teenagers avoid serious social issues and enjoy a happier life.

Are the problems mentioned in the text similar to those facing Vietnamese teens? Are there any other problems among teenagers in Viet Nam?

Ecosystems and humans

1 (76) Listen and read.

Ms Hoa: Nam, you went to Cuc Phuong National Park last

weekend, didn't you?

Yes, that's right. It was an amazing trip. This old Nam:

forest is home to thousands of different kinds of plants, insects, and animals. I really liked the colourful butterflies and the thousand-year-old tree.

Ms Hoa: Yes, Cuc Phuong National Park has a very rich

ecosystem.

Mai: What's an ecosystem, Ms Hoa?

Ms Hoa: It's a community that has living things, like flora

and fauna. Flora refers to plants and fauna refers to animals, including tiny organisms, like bacteria. Ecosystems also include non-living things, like

sunlight, air, soil, and water.

Nam: How important are ecosystems to life on our planet,

Ms Hoa?

Ms Hoa: Healthy ecosystems are essential for human health

and survival because they provide us with goods such as food, energy, raw materials, clean water,

and air.

Mai: So we should protect our ecosystems, shouldn't we?

Ms Hoa: That's right. Unfortunately, many ecosystems around the world are being lost, damaged, or destroyed because of climate change, pollution, and overuse of natural resources. It's very important to protect and restore them for future generations. We don't want our planet to lose even more biodiversity, do we?

PROTECTING ECOSYSTEMS - IDEAS FROM AROUND THE WORLD

The healthier our ecosystems are, the healthier our planet and its people become. Ecosystem restoration can help end poverty, fight climate change, and prevent loss of flora and fauna on every continent and in every ocean. Below are two examples of successful ecological projects.

The Great Green Wall

The goal of this project is to create the largest living structure on the planet. The plan is to restore 100 million hectares of damaged land, limit the amount of carbon dioxide and create 10 million green jobs in Africa. This will provide rich land, food security, and improve the region's ability to deal with climate change. Since its launch in 2007, Ethiopia and Nigeria have restored millions of hectares of land, and Senegal has planted more than 10 million trees.

Belize Barrier Reef

The Belize Barrier Reef was once described as the most amazing reef in the West Indies. It is home to a large diversity of plants and animals. It is Belize's top tourist destination, popular for scuba diving and snorkelling, and a UNESCO Natural World Heritage Site. Between 2009 and 2018, it was declared endangered because of pollution and the destruction of its ecosystems. However, because of conservation efforts, a large part of the reef is now protected. There are seven marine reserves. Belize has also stopped oil drilling near the Barrier Reef, banned plastic products, and created 'no-take zones', where removing plants and animals is not allowed.

CUC PHUONG NATIONAL PARK

Δ

As the oldest national park in Viet Nam, Cuc Phuong is a natural habitat of many rare animals and plants in Asia. It is

estimated that over 2,000 plant species and thousands of species of animals live in the 22,000-hectare ecosystem. The park also has the largest variety of birds in northern Viet Nam with more than 3,000 bird species.

B.

The rich ecosystem of Cuc Phuong attracts many nature lovers from all over the world. The park is very popular from April to May, when visitors have a chance to see more

than 400 species of colourful butterflies in the forest. That's why it has won the award of Asia's Leading National Park several times.

C.

Despite the government's effort to protect Cuc Phuong, several problems have been reported. Small parts of the park have been destroyed as people have cut down old trees without permission. In addition, rare animals were hunted illegally, some of which were fortunately rescued and returned to the forest. There are still irresponsible tourists who drop litter on the trails, which pollutes

the water and soil. These actions can damage the ecosystem of the park. Therefore, tougher measures should be taken to protect the biodiversity of the area.
